

## Česká asociace akademických technických sportů, z.s. Czech University Technical Sports Association

---

*„University sport is a phenomenon that has been inherent in youth and universities for more than 110 years.“*

**The Czech Association of Academic Technical Sports** is a dynamic multisport organization whose main mission is **to develop technical sports** through events, competitions and races of a mass, performance and top character, **especially among young people**, who make up almost 90 % of the Association membership base.

As part of the activities of the Association and its **15 sports university clubs**, **11 sports sectors** can be operated, including **2 Olympic sports**, such as biathlon and shooting. The offer of Olympic sports is complemented by **9 non-Olympic sports**. These are summer biathlon, aerial sports, paragliding, radio orienteering, diving, finswimming, fire sport, aerial modeling and sports kynology.

In all these sports sectors, **Czech University Championships** are organized every year, in cooperation with our partner organization **Czech University Sports Association**. The university championship in finswimming is part of the **Czech University Games** program every year.

The sport's highlight for athletes-students is the **summer and winter World University Games** (formerly World Universiades), organized in two-year cycles by the International University Sports Federation - **FISU**, as well as the **World University Cups** (formerly World University Championships).

We currently register **more than 1500 members in our 15 sports university clubs**. Activities and program of our Association are not only focused on registered members, but are open to all students of higher education institutions in our country.

In addition to Czech University Sports Association, our Association **cooperates in the organization of its competitions also with the relevant national associations** of individual sports sectors **and also with the universities** themselves, where our sports clubs are set up, especially with their sports faculties. In addition to FISU, **EUSA** (European University Sports Association), which organises **European University Games** and **European University Championships**, is also an important sports partner of our Association on the international sports scene.
